Certain-teed Roofing Resists Fire

Certain-teed Roofing is fire retarding and spark proof; consequently your fire risk is greatly reduced when Certain-teed roofs your buildings.

Burning embers carried by the wind from nearby fires are always a menace to old fashioned, inflammable wood shingle roofs. Certain-teed forms a permanent protection against sparks and embers and all such carriers of fire.

Because of the great risk of general conflagrations in congested districts, and of the lack of safe fire protection in the outlying and rural districts you should get this Certain-teed protection on your buildings.

In addition to being fire resisting, Certain-teed is a most economical roof. It resists all forms of weather attack—rain, sleet, snow, sun, etc. It is guaranteed by the manufacturer for 5, 10 or 15 years, according to the weight you select.

There is a scarcity of many types of roofing products—you can always get Certain-teed Smooth Surfaced Roofing, the most economical and serviceable roofing to be obtained.

See your dealer at once. He either has Certain-teed or can get it quickly from a nearby Certain-teed warehouse.

Sixty Hour Week VS. Forty Hour Week

Is the reason for the extreme high prices of today. The call for all kinds of merchandise was never so great as today. Production has been reduced one-third by the reduction of working hours in all industries, the consequence: a short market and mounting prices.

What We Must Do

Sell you wrist watch and buy an alarm clock and go to work, PRODUCE. The policy of THIS STORE for 10 years has been honest merchandise at an honest profit, and through all this period of high prices and long profits THIS STORE has not changed its policy one cent's worth.

Josh Billings said "The only value a postage stamp had was to stick to the thing till it got there," and we hope we have as much ability as a postage stamp.

*Is it not your duty to yourself to encourage the
Store that everlastingly fights for lower prices?*
